

My career began nearly 20 years ago as a chairside assistant working in a small, single doctor practice that progressed into several diverse positions within the industry. My experience provides a 360 degree view of what it takes to run a successful practice. I served as a VP of Operations for a multi-location practice that included one of the top producing locations in Texas. I managed a team including, general dentistry, orthodontics, and specialties all operating in unison to provide quality patient care. I also served as the Director of Operations for a group that transitioned two separate practices into a new entity. During my time there, I implemented new processes to help the organization by providing sound operational structure and efficiency. As a current member of the AADOM and SCN, I understand the importance of continuing education, ESPECIALLY in the insurance world. My unique background and desire to help offices reach their true potential, facilitated the founding of Expert Dental Solutions, L.L.C.
