

Raised on a cattle ranch in Wyoming, Amber grew up utilizing task management and attention to details. Amber Weber has utilized that same work ethic and passion in her 20+ years in the dental industry. Her 14 years practicing hygiene as an RDH, gives her an insight to the hygiene and clinical teams and systems. Her love and knowledge for patient care and a comprehensive periodontal approach has enabled her the ability to enhance and grow profitable hygiene departments.

Her 11 years spent in practice administration show through with her knowledge in financial, insurance, schedule, business KPI's and efficiency. Amber makes the entire team feel comfortable learning and growing, because like them, she was a team member.

Amber discovered embezzlement taking place in one of her client's office, bringing to light her aptitude for the kind of investigative work she now performs dental offices.

Before entering the dental arena, Amber learned how to connect with people in a genuine way. She served as Good Will Ambassador to agriculture and the sport of rodeo as Miss Rodeo Wyoming. During this year she traveled nationwide representing rodeo, public speaking and educating the public. This gave her experience to help build strong effective teams and a great foundation for speaking and presenting.

Amber lives in Texas with her husband. Together they are still a part of the agricultural world with performance rope horses and training.

Amber was recently the runner-up in the prestigious Spotlight on Speaking competition, featuring dentistry's best emerging speakers, and has been published in Dentistry Today magazine.
